I've attached five reports, which show the units restricted to specific populations (you can view totals on the final page of the reports), and here are the number of heads of households served in mental health categories in 2007. (The categories don't match exactly because the reports are from our contracting database, and the numbers of households served are from combined funders' annual reports, which have two different sets of special needs definitions. Please call if you need clarification).

Substance Abusers: 3328
Chronically Mentally Ill: 2426
Mentally Ill/Chemically Addicted: 1434
Survivors of Domestic Violence: 2639
Traumatic/Brain Injury: 84
Multiple Special Needs: 1682
Developmentally Disabled: 1474
Frail Elderly: 1841

For context, the total number of reported households served overall in the HTF portfolio in 2007 is 28,099.

I would appreciate if you could share this information with the larger group that was at the conference -- I received several questions relating to the data, and I'm sure they will appreciate the information.
